

COLOR CODING SCHEME FOR PRESSURE HOSES

PSI	Bar	Color
10,000	690	Yellow
15,000	1,034	Green
20,000	1,379	Blue
30,000	2,068	Silver
40,000	2,758	Orange
55,000	3,792	Red

On September 18, 2011, the **WJTA-IMCA** Board of Directors approved the addition of the following wording to the Recommended Practices for the Use of High Pressure Waterjetting Equipment.

Pressure hoses are designed for various pressures and could present a safety hazard if not used for the designated working pressure. In order to better identify the pressure in use, it is recommended that the color code scheme listed in the box above is used for the applicable maximum working pressure.

The color scheme should be easily identifiable at least two feet from both hose ends. January 1, 2013, is the effective date for implementation. Abrasion-proof stickers are acceptable in the interim.

Effective immediately, the new wording will be added to the current edition of the Recommended Practices for the Use of High Pressure Waterjetting Equipment.
